- Upload unlimited motives on each Page[Support SVG Format]
- Convert Text to QR-Code on Designs
- Copy and Paste Elements [Ctrl+c & Ctrl+v]
- Powerfull Color Tools
- Drawing Tools
- Using Google Fonts as Custome List via XML
- Save and Load the Design with a Design-Code without using a Database
- Print the Design
- Share the Design on Facebook
- Set user uploaded image as page Background-Image
- Navigation to all Book Designed Pages
- Optional Water-Logo on Page Designs
- Optional Save Designs Local on User Computer
- Optional usage as Free Book Creator or Calculate Book Design Price with order

Good to Know:

- After saving your Design, you will recieve an Email including your DesignCode, next time you can load Your Design including all detailed properties like Prices, Backgrounds, etc.. and continue working on it untill final version, then you can order this, Print-Designer be able to save your name, email and Address and loading this on next time for your convenience.

Main Installation & Settings:

Rename Application folder after unzip from **main** to **FlipBook-Creator**

Notice: JS folder files are all Obfuscated, normal files for changes/edit will be found in:

NOT_FOR_UPLOAD/LOCAL_JS/

Open [NOT_FOR_UPLOAD/LOCAL_JS/initApp.js](#):

```
window.appURL = "http://www.yourdomain.com/FlipBook-Creator/"; // set your Domain name
window.productPrice = "5.00"; // Book Template Price, works if isShop = true;
window.textPrice = "0.50"; // Each Text Block Price on Design, works if isShop = true;
window.motivePrice = "0.75"; // Each Image Price on Design, works if isShop = true;
window.backgroundImagePrice = "1.00"; // Each Page BackgroundImage Price on Design, works if isShop = true;
window.backgroundColorPrice = "0.50"; // Each Page BackgroundColor Price on Design, works if isShop = true;
window.currencySign="$";
window.isShop = false; // true: this activate price calculation during design + order option, false: make this a Free
                        FlipBook Creator
window.isLocalSave = false; // true: save each page design local, false: save page design under server
window.watermark = true; // true: add watermark on page designs
```

Preparing „js/initApp.js“ before Upload:

Please use Javascript Obfuscator from <http://javascriptobfuscator.com> to do this, open [NOT_FOR_UPLOAD/LOCAL_JS/initApp.js](#) with editor, copy All and paste it into above filed and then replace [js/initApp.js](#) source with **Obfuscated result**.

Open [settings.php](#):

```
$domain = "http://www.yourdomain.com/FlipBook-Creator/orders/"; // Enter your Domain name
$generatorDomain = "http://www.yourdomain.com/FlipBook-Creator/";
$contact_path = "http://www.yourdomain.com/FlipBook-Creator/images/contact/";
$email_to = "youremail@yourdomain.com"; // Admin Email
$userEmailSubject = "FlipBook -Creator| User Confirmation Email"; // Email Subject
$adminEmailSubject = "FlipBook -Creator| Admin Confirmation Email"; // Email Subject
$PaypalEmail = "youremail@yourdomain.com"; // Paypal Email, this will be use in confirmation email
$PaypalShipment = "10"; // Your Paypal Shipment Price
$PaypalCurrency = "USD"; // Your Paypal Currency
$PaypalLanguage = "US"; // Your Paypal Language
$BankInfos = "xxx xxx xxx xxxx"; // Bank Infos, this will be use in confirmation email
```

Open [share.php](#) and [order.php](#):

Facebook Share Page info settings:

```
<meta property="og:title" content="Hi there ..."/>
<meta property="og:description" content="This is my new Design by FlipBook-Creator!"/>
```

Now you can upload FlipBook-Creator[All files and Folders except NOT_FOR_UPLOAD folder] under your domain and call FlipBook-Creator as:

www.yourdomain.com/FlipBook-Creator

Note: If you want to rename „FlipBook-Creator“ folder, you should also rename all above settings.

How add my Motives or Backgrounds?

For this just drop your Motives or Backgrounds inside images/motives or images/backgrounds, xml files will update Automatic.

Motives can be in PNG or SVG formats.

How add my Special Google Fonts?

You can add unlimited fonts in xml/fonts.xml as:

Sample1:

```
<font  
family=""Jolly Lodger", cursive"  
name=""Jolly+Lodger"  
label=""Jolly Lodger"/>
```

Sample2:

```
<font  
family=""Kranky", cursive"  
name=""Kranky"  
label=""Kranky"/>
```

FlipBook-Creator Save/Order Options:

Here we need a valid Email from user to send the **DesignCode** , with this Code, user be able to load and Edit the Design again before Order.

After preparing Final Design, user can Order it and recieve final confirmation email with Payment informations.

FlipBook-Creator Print Option:

Here user can Print Active-Design-Side, [user should firts save the Design]

FlipBook-Creator Share Option:

Here user can Share Active-Design-Side, [user should firts save the Design]

FlipBook-Creator CurveText Options:

User can simply change a **NormalText** to a **CurveText** and change **Curve Direction & Spacing**.

- 1- Add new Page, user should save current Page to be able adding new one.
- 2- Save Book Page, here user should enter Information for save process just on first time
- 3- Navigation for viewing all Pages
- 4- Convert Uploaded Image to Page Background [Fix your custom Image as Background]
- 5- View Created Flip Book from your Design Live!

PSD Sources:

For Logo and all Icons, there are PSDs under:

[NOT_FOR_UPLOAD/PSD/](#)

How customize FlipBook-Creator Texts/Labels/Colors/EmailTexts:

- Statistic Texts and Labels will be found in index.html
- Element Colors can be change in css/style.css
- EmailTexts comes from **order.php**, **saveFiles/savePageInfos.php**
- Dynamic Labels will be found in initApp.js* and designer.js*

* Please edit them in **NOT_FOR_UPLOAD** folder and after **Obfuscating**, replace them in **js** folder.

What is BookGenerator.php in project root?

If you want to use Flip Book Creator selling Custom Design Books, you need to set WaterLogo on your Tools to protect the designs, after user payment confirmation, you can Generate a new version without Water-Logo via BookGenerator.php and send the Book URL to customer for his usage.
